### **TIS Information Tool**

#### 1. Contact Data

Name: ENDURANCE TECHNOLOGIES LIMITED

**Department:** 

**Email:** Telephone Number: +91 240 2556686

SIN Number: Sales Responsible: HARIKRISHN

**Order Number:** 

# 2. To ol Type

Metal Forming Plastics Processing AL Die Casting

**HPDC** 

Other:

### 3. Tool condition

Visible Porosity, Cracks, Welded Zones

**Comment: Die having severe heat checks** 

# 4. Detailed Inspection

**Customer Data:** 

Tool Material(target): H13

Hardness(target)HRC: 44-46

Tomporing Cycle C/F: 540

rempering Cycle C/F. STU

No.parts to send(target): 12

QA Requested: Hardness Check, Full QA\* Report

Lab Analysis: Tool 1 Tool 2 Tool 3

Material (actual): NA NA NA

Hardness (actual): 46-47 46-47 NA

Tempering Condition: NA NA NA

No. parts received(actual): 13 0

Detailed Inspection Comment: There was a difference of 2HRc between customer measurements and o

### 5. Surface Solution

**Coating: BALINIT LUMENA DUPLEX** 

**Pre-polishing requested** 

**Functional surface identified** 

Surface condition of tool on arrival: Technical Polish Level

Rz/Ra measured: 0.09/ 0.08/ 0.09

**Pre-Polish Requrements: Technical Polish** 

Post coating polish requirements: Top blasting + Post polishing

Customer specific requirements: Heat checks get generated on the die profiles need to remove maximu

chosen coating for this die because to prolong further crack generation.

#### 6. Tool Sketch

6. Tool Sketch				
Tool designation: Swing arm f	or KTM Processin	g material: AL( AL	.)	
Material strength:	Material thickness:	g(122	' )	
Lubrication applied:				
Blank Coating:	Etched structure	e: None		
Plastic Injection:				
Performance of previous solution: No previous solution provided
